

Dear parents of our almost Kindergarteners:

In order to help your child prepare for Kindergarten, we are asking our kindergarten families to participate in our summer "Staying Sharp" program just like our older students do. With minimal time each week, you can help prepare your child for a successful school year. We are asking that you practice identifying letters (and/or sounds if appropriate for your child) and numbers one through ten, as well as reading your child several times a week. You may make flashcards, or play online games on your tablet or phone. Do whatever works best for your child. Mix it up and make it fun! A little time on your part will reap big rewards once school starts.

As a reward for their efforts, we will have a Back To School Bash during the school day on the first week of school. There will be games, prizes, and food for children who complete ALL sections of the Staying Sharp packet. Please encourage your child to participate.

Thanks for your help!
